CISA - Certified Information Systems Auditor Training

Duration: 5 days;

Since 1978, the Certified Information Systems Auditor (CISA) program, sponsored by the Information Systems Audit and Control Association® (ISACA®), has been the globally accepted standard among information systems (IS) audit, control, and security professionals.

This course will highlight the technical skills and practices needed to successfully challenge the CISA examination. The CISA is a preferred certification by organizations around the world and signifies a professional commitment to serving an organization and the IS audit, control, and security industry.

This course will cover all seven domains that make up the body of knowledge covered by the CISA examination and will equip information systems professionals with the knowledge and technical concepts required to obtain this certification.

Certification
The CISA exam is offered each year in June and December, consists of 200 multiple-choice questions, and is focused on the five domains defined by ISACA.

What You'll Learn

- In-depth coverage of the five domains required to pass the CISA exam:
- The Process of Auditing Information Systems
- Governance and Management of IT
- Information Systems Acquisition, Development, and Implementation
- Information Systems Operations, Maintenance, and Support
- Protection of Information Assets

Who Needs to Attend
IS audit, control, assurance, and security professionals, including IT consultants, auditors, managers, security policy writers, privacy officers, information security officers, network administrators, security device administrators, and security engineers, who have five years of experience with audit, IT systems, and security of information systems.
